HoLDS Capture

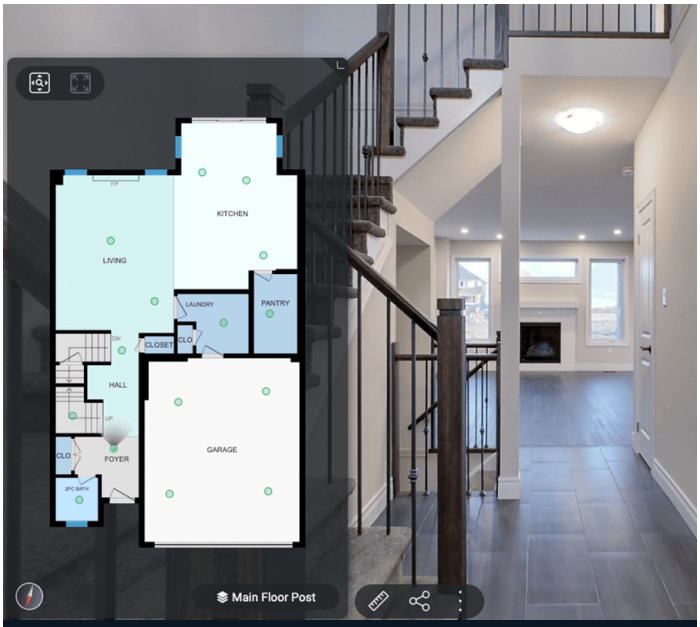

PROPERTY DOCUMENTATION
Calgary & surrounding areas

Preserve the property.
Keep the details.

Professional 360° + LiDAR capture creates a navigable record of the spaces, layout, and visible work - ready to reference when your project moves on.

Before walls close

After completion

Public iGUIDE construction example. The same home at two stages.

01 New Build Capture

Record exposed work before concealment, then return for final handover.

02 Existing Property Capture

Create a useful baseline of your property as it exists today.

03 Renovation Capture

Connect before conditions, visible rough-ins, and the completed renovation.

04 Capture Survey

Scope plans, CAD, and existing-condition outputs for your design team.

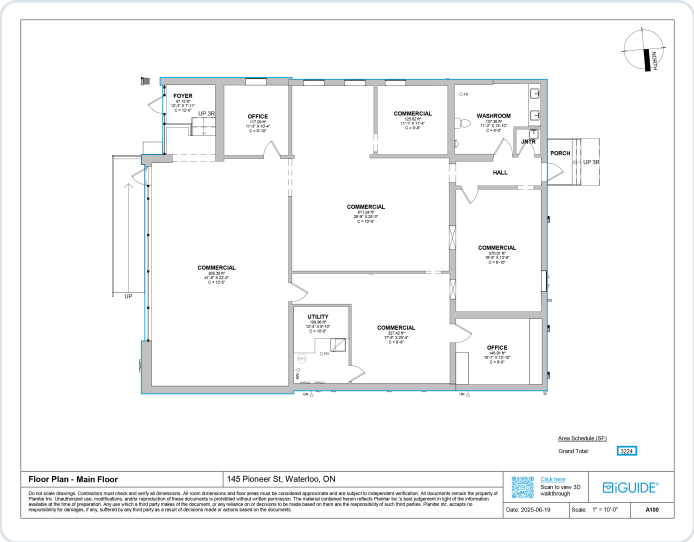

Single Capture visit

from $325 CAD

Residential reference: one visit at 2,000 sq ft in the local service area. Survey packages, additional stages, travel, and optional outputs are scoped separately.

Choose the deliverables
that make the record useful.

Start with the property record. Select the plans, drawings, and information your team needs to use it.

Measured floor-plan sample

Room layout, dimensions, and area information.

CAD output illustration

PNG preview. Editable DWG and other source files depend on the agreed scope.

360° record + original files	Navigate spaces and retain the selected original deliverables.
Plans, drawings + data	Drafted floor plans, CAD/DWG, site plans, elevations, or spatial outputs as scoped.
Systems + property history	Optional Systems Tagging and Property Passport connect useful property information.

Plan your Capture

Tell us the address, approximate size, project stage, access, and intended use. We confirm your full scope, deliverables, and price before booking.

Samples: iGUIDE. Plan and CAD examples: 145 Pioneer St, Waterloo, ON. Records document visible, accessible conditions. Radix has no drafted floor plan; Systems Tagging requires Standard or Premium floor-plan processing. Property Passport is optional. Verify critical construction or fabrication dimensions independently.
